WHO WE ARE

Arkces Energy is a pan-African integrated energy company delivering innovative and sustainable solutions across the oil and gas value chain. We operate across upstream, midstream, and downstream sectors with a strategic vision to drive energy security, efficiency, and economic growth across Africa.

Our multi-disciplinary approach combines oil and gas operations with civil engineering works, positioning Arkces Energy as a trusted partner for end-to-end project delivery — from groundwork and structural development to full-scale energy service delivery.

Founded in 2025, Arkces Energy is led by professionals with over years combined industry experience across major energy and infrastructure projects in Nigeria and West Africa.

OUR VISION

To become a leading force in Africa's energy and infrastructure landscape, powering industrial growth through safe, efficient, and sustainable solutions.

OUR MISSION

To deliver integrated energy and infrastructure services that meet global standards of quality, safety, and innovation while creating value for clients, communities, and stakeholders.

CORE VALUES

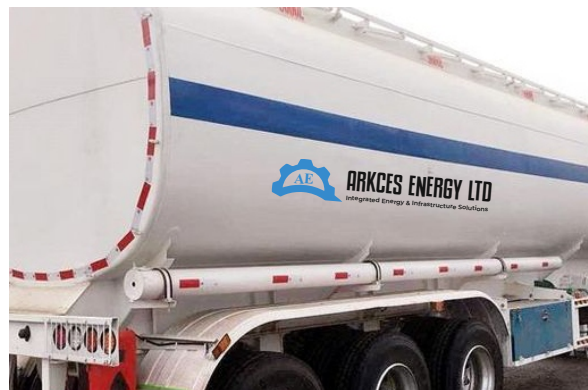

Safety First	–	Zero Harm is non-negotiable
Integrity	–	We deliver what we promise
Innovation	–	Technology-led solutions
Excellence	–	Global standards, local delivery
Sustainability	–	Protecting people and planet

OIL & GAS OPERATIONS

We provide reliable support across the petroleum value chain

1. Procurement & Supply – General procurement, Sourcing and delivery of PMS, AGO, DPK, LPG, and lubricants to industrial clients
2. Logistics & Haulage – Dedicated fleet and partners for safe transportation of crude and refined products
3. Facility Support Services – Operations & maintenance for depots, flow stations, and mini-refineries
4. Energy Project Development – Advisory, feasibility studies, and EPC support for energy assets

CORE SERVICES: CIVIL & INFRASTRUCTURE

We build the foundations that power energy

1. Industrial Facility Construction – Tank farms, depots, workshops, power plants
2. Structural Engineering – Design, analysis, and supervision by COREN-certified engineers
3. Site Development – Earthworks, drainage, roadworks, fencing for energy sites
4. Renovation & Upgrades – Retrofit of aging infrastructure to modern standards
5. Project Management – Cost control, scheduling, and QA/QC from inception to handover

INTEGRATED DELIVERY

Civil works → Mechanical/Electrical installation → Commissioning → Operations support

WHY CHOOSE ARKCES ENERGY

Your Single-Point Partner for Energy + Infrastructure

1. **Integrated Model** – One contractor for both civil and energy scopes reduce interface risk, cost, and delays.
2. **Pan-African Focus** – Designed to solve Africa's energy security challenges with local content and global best practice.
3. **HSE Leadership** – Zero Harm culture. DPR, NUPRC, and OSHA-compliant operations.
4. **Technical Expertise** – Projects led by COREN-certified engineers with proven track record.
5. **End-to-End Capability** – We own the process from feasibility to facility handover.

TARGET SECTORS & CLIENTS

- International & Indigenous Oil Companies – Upstream, midstream, downstream support
- Energy Facility Owners – Depots, terminals, IPPs, CNG/LPG plants
Industrial & Manufacturing – Factories requiring power + civil infrastructure
- Government MDAs – NNPC Ltd, Ministry of Petroleum, Infrastructure Agencies
- Real Estate Developers – Commercial projects needing energy + civil solutions

We are pre-qualified and bid-ready for private and public sector tenders.

EQUIPMENT & RESOURCES

MOBILIZATION CAPACITY

Arkces Energy maintains direct access to critical equipment through strategic lease agreements:

1. Oil & Gas: Petroleum tankers [10-45,000L], product pumps, metering systems, safety equipment
2. Civil Works: Excavators, graders, concrete mixers, total stations, welding machines, scaffolding
3. Support: Project vehicles, 40ft containers, power generators, survey tools

We mobilize to site within 72 hours anywhere in Nigeria.

Arkces
Energy Ltd

HSE & QUALITY COMMITMENT

ZERO HARM POLICY

Safety is our license to operate. Arkces Energy commits to:

1. Regulatory Compliance – Full adherence to DPR, NUPRC, OSHA, FMEnv guidelines
2. Personnel Safety – Mandatory PPE, safety induction, daily toolbox talks on all sites
3. Environmental Protection – Spill prevention, waste management, EIA compliance
4. Quality Assurance – ISO 9001:2015 principles. All works supervised by COREN engineers with ITP and QA/QC documentation

No job is so urgent that it cannot be done safely.
